

# Overview and Precise Data

**Our tailored cloud solution is tested and proven in real-world conditions.**

The platform has been operational since 2018. Globally, we are rapidly approaching 400 users and 3,000 connected devices.

# Gain the Big Picture...

...and get precise data in the cloud. Welcome to a daily workflow where managing your fleet is simple, easy, and straightforward. A comprehensive overview is right at your fingertips – on your mobile screen. Accurate data is gathered in one place, ready to be integrated into your next ESG report.

Avoid costly and risky development efforts. Our tailored cloud solution is tested and proven in real-world conditions. The platform has been operational since 2018. Globally, we are rapidly approaching 400 users and 3,000 connected devices. CLARA Cloud works – 24/7, all year round, in any weather.

Our solution is designed for both manufacturers and end-users of outdoor mobile robots and automated machines. We eliminate paperwork in the office and help machines operate efficiently in the field. Across industries as diverse as agriculture, property management, nature conservation, parks and roads, and sports facilities.

**With CLARA Cloud, you get:**

- An accessible fleet management platform with data collection and reporting
- Simple operation and secure communication with machines
- Real-time and historical position, direction, and speed data

- Notifications on operational disruptions, maintenance, and service intervals
- Precise information on completed tasks
- Relevant data such as temperature, vibrations, and obstacles
- Job reports with statistics on operating hours, estimated fuel savings, and CO<sub>2</sub> reduction

We provide hardware, software, and configuration. For maximum operational reliability, our data solution runs on servers located in Denmark and the EU.

The cloud solution is customized with your logo, graphic profile, and industry-specific terminology. We set up users and your organization so the system is ready to use. If you have specific reporting needs or require additional functionality, we are ready with tailored solutions.

## DATA IS A PREREQUISITE FOR EFFICIENT OPERATIONS

“Our latest irrigation machines offer a digital solution based on CLARA Cloud. Data collection is essential for efficient operations that take environmental and climate considerations into account. Without data, there’s no ESG reporting – something that affects everything from reputation to creditworthiness.”

*Danny Hansen, Factory Manager, FASTERHOLT Maskinfabrik A/S*

### CLARA Cloud

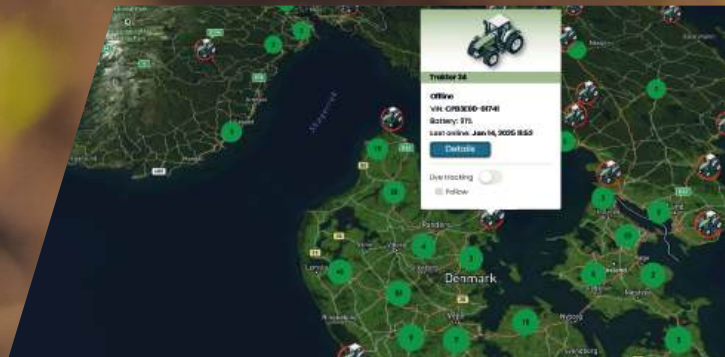

- Fleet management and data collection
- In operation since 2018
- Close to 3,000 machines and robots connected
- Close to 400 users
- Collects GPS positions and operational data, 24/7 worldwide
- Runs on servers in Denmark and the EU
- Provides a comprehensive overview of machines, operations, and production data
- Foundation for ESG reporting, including CO<sub>2</sub> reductions

# Feel free to contact us for a non-binding conversation

We are always looking for partners for new research and development projects. Let's create something new and groundbreaking together. We look forward to hearing from you and will bring our strongest team: Artificial as well as genuine human intelligence. A reliable cloud solution delivered to you by a dedicated team at Conpleks.
